ABOUT MYSELF

I recently qualified as a Web Developer at Le Wagon in London, having previously worked in the entertainment industry as a Company Manager, Creative Designer and a Performer. I have always worked in a team and I am an extremely well-organised person. I am looking for a role as a Front-end Web Developer or Full Stack Web Developer in a fast-moving and challenging environment. Having come from the entertainment industry having a keen eye for detail and style is very important. I am willing to relocate anywhere in the UK and I can't wait to get started.

FRONT END - WEB DEVELOPER (2020 -)

At Le Wagon in London I retrained as a Web Developer on a Full Stack course covering both front-end and back-end. My primary focus and strength is front-end development. I pride myself on having a keen eye for detail and making the websites I develop interactive and responsive. I learned and applied all the languages and environments shown in the 'Skills' section below.

Example websites I have developed can be found at:
